Question 2

Modern Technology and Globalization

Modern technology has ~~becam~~ become an important part of our daily life. It has made globalization faster and has connected people from all over the world. Modern technology has made our life easier than before.

Today, students can attend online classes and even sit for online examinations from their homes. Many people can also do remote jobs for foreign companies without leaving their home or own country. Modern technology has made communication very easy through email, video calls and social media.

Another great benefit is e-health. Patients can consult doctors on line and recieve medical advice without visiting a hospital. Technology has also improved business, banking, and education.

CamScanner

However, we should always corroborate information before sharing it because false news can spread very fast. Technology has also created a more cosmopolitan world. In this world, now, people learn about different cultures and ideas. Our main criterion should be to use technology for the benefit of society.

In conclusion, modern technology and globalization have changed our lives. If we use technology wisely, it will culminate in a better future for everybody.
