56 Puzzle Hit Parade for IBA MBA

Puzzle-1:
In a game, exactly six Inverted cups stand side by side in a straight line, and each has exactly one ball hidden under it. The cups are numbered consecutively 1 through 6. Each of the balls is painted a single solid color. The colors of the balls are Green, Magenta, Orange, Purple, Red and Yellow. The balls have been hidden under the cups in a manner that confirms the following conditions.

- The purple ball must be hidden under a lower numbered cup than the orange ball.
- The red ball must be hidden under a cup immediately adjacent to the cup under which the magenta ball is hidden.
- The green ball must be hidden under cup 5.

Group by Md Mahmud

1. Which of the following could be the colors of the balls under the cups, in order from 1 through 6?
a) Green, Yellow, Magenta, Red, Purple, Orange.
b) Magenta, Green, Purple, Red, Orange, Yellow.
c) Magenta, Red, Purple, Yellow, Green, Orange.
d) Orange, Yellow, Red, Magenta, Green, Purple.
e) Red, Purple, Magenta, Yellow, Green, Orange.

2. If the magenta ball is under cup 4, the red ball must be under cup:
a) 1 b) 2 c) 3 d) 5 e) 6

3. A ball of which of the following colors could be under cup 6?
a) Green b) Magenta c) Purple d) Red e) Yellow

4. If the purple ball is under cup 4, the orange ball must be under cup:
a) 1 b) 2 c) 3 d) 5 e) 6

5. Which of the following must be true?
a) The green ball is under a lower - numbered cup than the yellow ball
b) The orange ball is under a lower - numbered cup than the green ball
c) The purple ball is under a lower - numbered cup than the green ball.
d) The purple ball is under a lower - numbered cup than the red ball
e) The red ball is under a lower - numbered cup than the yellow ball

6. If the orange ball is under cup 2, balls of which of the following colors could be under cups immediately adjacent to each other?
a) Green and Magenta.
b) Green and Purple
c) Orange and Yellow
d) Purple and Red
e) Red and Yellow

7. If the magenta ball is under cup 1, balls of which of the following colors must be under cups immediately adjacent to each other?
a) Green and Orange
b) Green and Yellow
c) Purple and Red
d) Purple and Yellow
e) Red and Yellow

Puzzle-3:

A government is assigning each of six embassy office workers - Farr, Golden, Hayakawa, Inserra, Jones, and Kovacs to embassies. There are four embassies. Embassies L and M are located in countries with dry climates, whereas embassies P and T are located in countries with humid climates. The office workers must be assigned according to the following rules:

- Each embassy must have at least one of the workers assigned to it.
- At least one embassy in a humid climate must have at least two workers assigned to it.
- Golden cannot be assigned to the same embassy as Kovacs.
- Inserra must be assigned to an embassy in a dry climate.
- Jones must be assigned to an embassy in a humid climate.

1. Which of the following is an acceptable assignment of the workers to the embassies?

	L	M	P	T
a)	Farr,Golden	Inserra,Kovacs	Hayakawa	Jones.
b)	Golden,Kovacs	Inserra	Jones	Farr,Hayakawa.
c)	Golden	Farr, Inserra	Kovacs	Jones,Hayakawa
d)	Jones	Golden,Inserra	Hayakawa	Farr,Kovacs.
e)	Kovacs	Farr,Hayakawa	Inserra	Golden,Jones.

IBA-MBA Preparation for Beginners

2. Which of the following must be assigned either to embassy L or to embassy M?

a) Farr b) Golden c) Hayakawa d) Inserra e) Kovacs

3. Which of the following CANNOT be true?

a) One worker is assigned to L.
b) Two workers are assigned to P.
c) Two workers are assigned to L.
d) Three workers are assigned to M.
e) Three workers are assigned to T.

4. If Golden and Kovacs, are assigned to L and M, respectively which of the following must be true?

a) Farr is assigned to either P or T
b) Inserra is assigned to either P or T
c) P and T each have two workers assigned to them
d) Hayakawa is assigned to L
e) Hayakawa is assigned to T

5. If Golden, Hayakawa, and Kovacs are among the workers assigned to embassies in humid climates, which of the following must be true?

a) Farr is assigned to an embassy to which none of the other five office workers is assigned

b) Golden is assigned to an embassy to which none of the other five office workers is assigned.

c) Jones is assigned to the same embassy as Kovacs.

d) Hayakawa is assigned to the same embassy as Golden.

e) Hayakawa is assigned to the same embassy as Kovacs.

Puzzle- 4:

An artist needs to arrange seven drawings on the wall of a room in an art gallery. The drawings must be placed in seven consecutive positions, numbered 1 through 7, along the wall. Four of the drawings-Fan, Gate, Harp, and Iris -depict objects, whereas three of the drawings-Salem, Tempe, and Utah-depict landscapes. The order in which the drawings are arranged along the wall must meet the following conditions:

- No two drawings of objects can be placed next to each other.
- Iris cannot immediately precede Salem.
- Harp must immediately precede Tempe.
- If Gate is in the third position, then Salem must be in the second position.

1. Which of the following is an acceptable arrangement of the drawings along the wall, from position 1 to position 7?

a) Fan, Salem, Gate, Tempe, Iris, Utah, Harp
b) Harp, Tempe, Iris, Utah, Gate, Salem, Fan
c) Iris, Utah, Gate, Fan, Salem, Harp, Tempe
d) Salem, Fan, Utah, Harp, Tempe, Gate, Iris
e) Utah, Salem, Gate, Harp, Tempe, Fan, Iris

2. Which of the following lists the three positions on the wall in which Harp could be placed?

a) First, second, and third
b) First, third, and fifth
c) Third, fourth, and fifth
d) Third, fifth, and sixth
e) Third, fifth, and seventh

3. If Gate is in the third position, Utah must be placed in which of the following positions?

a) First b) Second c) Fourth d) Fifth e) Sixth

4. If Salem must be placed on the wall in a higher numbered position than Tempe and in a lower numbered position than Utah, Fan must be placed in which of the following positions?

a) First b) Second c) Third d) Fourth e) Fifth

Puzzle-5:

Reiko, Carlos, and Ida bought ice cream cones. Each person chose a different flavor. The flavors were mint chocolate chip, vanilla, and strawberry. Use the clues to figure out who chose which flavor.

- Reiko does not like mint.
- Ida, Reiko, and the person who chose strawberry enjoyed the sunshine as they ate their ice cream.

	mini chip	Vanilla	Straw-berry
Reiko			
Carlos			
Ida

Puzzle- 6:

A volunteer uses a truck to pick up donations of unsold food and clothing from stores and to deliver them to locations where they can be distributed. He drives only along a certain networks of roads.

In the network there are two-way roads connecting each of the following pairs of points. 1 with 2, 1 with 3, 1 with 5, 2 with 6, 3 with 7, 5 with 6, and 6 with 7. There are also one way roads going from 2 to 4, from 3 to 2, and from 4 to 3. There are no other roads in the network, and the roads in the network do not intersect.

To make a trip involving pickups and deliveries, the volunteer always takes a route that for the whole trip passes through the fewest of the points 1 through 7, counting a point twice if the volunteer passes through it twice.

The volunteer's home is at point 3. Donations can be picked up at supermarket at point 1, a clothing store at point 5, and a bakery at point 4. Deliveries can be made as needed to a tutoring center at point 2, a distribution center at point 6, and a shelter at point 7.

Group by Md Mahmud

1. If the volunteer starts at the supermarket and next is to go to the shelter, the first intermediate point his route passes through must be.

a) 2 b) 3 c) 5 d) 6 e) 7

IBA-MBA Preparation for Beginners
Public group · 20.0K members

2. If starting from home, the volunteer next is to make pickups for the shelter at the supermarket and the bakery (in either order), the first two intermediate points on his route, beginning with the first must be.

a)1 and 2 b) 1 and 3 c) 2 and 1 d) 2 and 4 e) 4 and 2

3. If starting from the clothing store, the volunteer next is to pick up bread at either the supermarket or the bakery (whichever stop makes his route go through the fewest of the points) and then is to go to the shelter, the first two points he reaches after the clothing store, beginning with the first, must be.

a) 1 and 2 b) 1 and 3. c) 4 and 2 d) 6 and 2 e) 6 and 4

4. If the volunteer is to make a trip starting at the shelter, next going to the bakery for a pickup, and then ending at the distribution center, the first two intermediate points on his route beginning with the first can be.

a) 3 ard 1 b) 3 and 4 c) 4 and 2 d) 6 and 2 e) 6 and 5

Puzzle- 7:

A developer is planning to build a housing complex on an empty tract of land. Exactly seven different styles of houses- Q, R, S, T, W, X, and Z - will be built in the complex. The complex will contain several blocks, and the developer plans to put houses of at least three different styles on each block. The developer will build the complex according to the following rules:

- Any block that has styles Z on it must also have style W on it.
- Any block adjacent to one that has on it both style S and style X must have on it style T and style Z.
- No block adjacent to one that has on it both style R and style Z can have on it either style T or style W.
- No block can have on it both style S and style Q.

1. Which of the following can be the complete selection of house styles on a block?
1. Q, R, S 2. Q, S, X 3. R, T, Z 4. S, W, Z 5. T, X, Z

2. Which of the following house styles must be on a block that is adjacent to one that has on it only styles S, T, W, X, and Z?
1. Q 2. R 3. S 4. W 5. X

3. Which of the following can be the complete selection of house styles for a block that is adjacent to exactly one block, if that one block has on it styles S, T, W, and X only ?
1. S, T and X
2. T, X and Z
3. R, S, X and Z
4. S, T, W and X
5. T, W, X and Z

Puzzle- 9:

Each of six automated tasks, numbered 1 through 6, takes one full hour to complete. No time elapses between the completion of any of the six tasks and the beginning of another task. The group of six tasks must be completed in the shortest possible time period, subject only to the following restrictions:

- Tasks 1 and 2 must both be completed before any of the other tasks can be begun.
- Task 3 must be completed before task 4 can be begun.
- At any one time, no more than one task can be performed, except that tasks 4 and 5 can be performed concurrently.

1. Which of the following tasks could be the second task performed?

a) 2 b) 3 c) 4 d) 5 e) 6

2. The shortest possible time period in which the group of six tasks can be completed is__

a) two hours b) three hours c) four hours d) five hours e) six hours

Group by Md Mahmud

3. Which of the following CANNOT be true of any acceptable ordering of tasks?

a) Task 1 is performed before task 2.
b) Task 3 is performed before task 6.
c) Task 4 is performed before task 6.
d) Task 5 is performed before task 3.
e) Task 6 is performed before task 3.

IBA-MBA Preparation for Beginners

Puzzle- 11:

Three adults-Roberto, Sarah, and Vicky-will be traveling in a van with five children-Freddy, Hilary, Jonathan, Lupe, and Marta. The van has a driver's seat and one passenger seat in the front, and two benches behind the front seats, one bench behind the other. Each bench has room for exactly three people. Everyone must sit in a seat or on a bench, and seating is subject to the following restrictions:

- An adult must sit on each bench.
- Either Roberto or Sarah must sit in the driver's seat.
- Jonathan must sit immediately beside Marta.

1. Which of the following can sit in the front passenger seat?
(A) Jonathan (B) Lupe (C) Roberto (D) Sarah (E) Vicky

2. Which of the following groups of three can sit together on a bench?
(A) Freddy, Jonathan, and Marta
(B) Freddy, Jonathan, and Vicky
(C) Freddy, Sarah, and Vicky
(D) Hilary, Lupe, and Sarah
(E) Lupe, Marta, and Roberto

3. If Freddy sits immediately beside Vicky, which of the following CANNOT be true?
(A) Jonathan sits immediately beside Sarah.
(B) Lupe sits immediately beside Vicky.
(C) Hilary sits in the front passenger seat.
(D) Freddy sits on the same bench as Hilary.
(E) Hilary sits on the same bench as Roberto.

4. If Sarah sits on a bench that is behind where Jonathan is sitting, which of the following must be true?
(A) Hilary sits in a seat or on a bench that is in front of where Marta is sitting.
(B) Lupe sits in a seat or on a bench that is in front of where Freddy is sitting.
(C) Freddy sits on the same bench as Hilary.
(D) Lupe sits on the same bench as Sarah.
(E) Marta sits on the same bench as Vicky.

Puzzle- 12:

An office is one of several in which all the furniture is to be repainted. The office contains exactly four pieces of furniture-a bookcase, two chairs, and a desk-and no furniture is to be moved into or out of that office. The repainting specifications are as follows:

- On completion of repainting, any piece of furniture in an office must be uniformly brown, green, tan, or white.
- On completion of repainting, at least one of the pieces of furniture in an office must be green, and the desk must be either brown or tan.
- If, prior to repainting, a piece of furniture is either orange or yellow, that piece must be white on completion of repainting.
- If, prior to repainting, a piece of furniture is tan, that piece must remain tan on completion of repainting.

All of the specifications above can and must be met in each office scheduled for repainting.

1. Which of the following could be the furniture colors in the office on completion of repainting?

Bookcase	Chair	Chair	Desk
(A) Yellow	Brown	White	Tan
(B) White	Green	Green	Brown
(C) Green	White	Orange	Brown
(D) Brown	Tan	White	Tan
(E) Tan	White	Brown	Green

IBA-MBA Preparation for Beginners
Public group · 20.0K members

2. If, prior to repainting, one chair in the office is Orange and the other chair is tan, which of the Following must be true of the furniture in the office on completion of repainting?

(A) The bookcase is green.
(B) Exactly one of the chairs is brown.
(C) Exactly one of the chairs is orange.
(D) Both of the chairs are white.
(E) The desk is tan.

3. If, prior to repainting, the desk in the office is green and the other three pieces of furniture are white, then of these four pieces of furniture there must be how many that are painted a color that differs from its color prior to repainting?

(A) Four (B) Three (C) Two (D) One (E) None

4. Prior to repainting, and given the repainting specifications, the desk in the office could have been any of the following colors EXCEPT__

(A) brown (B) gray (C) tan (D) white (E) yellow

5. If, prior to repainting, the bookcase is white, on I chair is orange, one chair is tan, and the desk is green, which of the following must be true of the furniture in the office on completion of repainting?
(A) At least one piece of furniture is brown.
(B) Only one piece of furniture is green.
(C) Only one piece of furniture is tan.
(D) Exactly two pieces of furniture are white.
(E) Exactly two pieces of furniture are changed in color as a result of repainting.

6. Which of the following could be true of the furniture in the office prior to repainting if, also prior to repainting, three of the pieces of furniture in the office are tan?
(A) The desk is brown.
(B) The desk is green.
(C) One piece of furniture is white.
(D) One piece of furniture is yellow.
(E) The fourth piece of furniture also is tan.

2. Which of the following lists the three positions on the wall in which Harp could be placed?

a) First, second, and third
b) First, third, and fifth
c) Third, fourth, and fifth
d) Third, fifth, and sixth
e) Third, fifth, and seventh

3. If Gate is in the third position, Utah must be placed in which of the following positions?

a) First b) Second c) Fourth d) Fifth e) Sixth

4. If Salem must be placed on the wall in a higher numbered position than Tempe and in a lower numbered position than Utah, Fan must be placed in which of the following positions?

a) First b) Second c) Third d) Fourth e) Fifth

Puzzle- 18:

Researchers know that exactly six prehistoric iron working sites-Q, R, S, T, V, and X-existed in the Windham area. Recently, the researchers have discovered three objects-1, 2, and 3-that they know must have been made by ironworkers in the Windham area. The researchers would like now to determine the specific site at which each object was made. The objects are different enough in composition and style to leave no doubt that each was made at a different site. In addition, the researchers have established the following:

- If any of the objects was made at Q, none of them was made at T.
- If any of the objects was made at R, none of them was made at S.
- One of the objects was made at V.
- Object 2 was not made at X.
- Object 3 was made neither at S nor at X.

1. If Object 1 was made at T, Object 3 could have been made at which of the following?
(A) Q (B) R (C) S (D) T (E) X

Group by Md Mahmud

2. Object 1, Object 2, and Object 3, respectively, could have been made at
(A) Q, S, and X (B) R, X, and V (C) T, V, and S (D) V, Q, and T
(E) V, S, and Q

IBA-MBA Preparation for Beginners
Public group · 20.0K members

3. If neither Q nor T was a site at which any of the objects was made, which of the following must be true?
(A) Object I was made at X.,
(B) Object 2 was made at S.
(C) Object 2 was made at V.
(D) Object 3 was made at R.
(E) Object 3 was made at V.

4. The researchers could determine exactly which object was made at which site if they knew that the only three sites at which objects were made were__
(A) Q, R, and V
(B) Q, V, and X
(C) R, T, and V
(D) S, T, and V
(E) S, V, and X

Puzzle- 19:

A circus manager must divide eight circus acts—F, L, M, O, R, T, X, and Z—into two groups of four acts each, one group scheduled to perform, one act at a time, in ring 1 and the other group scheduled to perform, also one act at a time, in ring 2. All acts take equally long to perform, and every act that takes place in one of the rings must be scheduled for exactly the same time slot as an act that takes place in the other ring. The schedule must also conform to the following conditions:

- Act F must take place in one of the rings at the same time that act M takes place in the other ring.
- Act L must take place in one of the rings at the same time that act O takes place in the other ring.
- Act R must take place in the same ring as act F.
- Act T must take place in the same ring as act O.
- Act X must be the second act that takes place in ring 2

1. Which of the following, without regard to the order in which they will be performed, could be the group of acts to be scheduled for performance in ring 1?
(A) F, L, M, and T
(B) F, L, O, and R
(C) L, M, O, and T
(D) M, O, T, and Z
(E) O, R, T, and Z

2. If act T performs in ring 1, which of the following acts must perform in ring 2?
(A) F (B) L (C) M (D) R (E) Z

3. If act R must perform in one of the rings at the same time that act T performs in the other ring, which of the following must be the second act in ring 1?
(A) F (B) L (C) M (D) O (E) Z

4. If the order, from first to last, of circus acts in ring 2 is O, X, T, M, which of the following is an acceptable order of acts in ring 1, also from first to last?
(A) F, R, L, Z
(B) L, Z, F, R
(C) L, Z, R, F
(D) Z, L, F, R
(E) Z, R, L, F

5. If act F must perform between act X and act R in ring 2, which of the following must be the first act in ring 1?
(A) L (B) M (C) O (D) T (E) Z

6. If act T must take place in ring 1 immediately after act F and immediately before act R, which act must be the third act in ring 2?
(A) L (B) M (C) O (D) T (E) Z

Puzzle- 20:

In a display of products available from a paper manufacturer, exactly eight folders are to be displayed on eight stands that are lined up in a straight line and numbered consecutively 1 through 8 from left to right. There are three gray folders, two purple folders, two yellow folders, and one orange folder.

The folders must be displayed according to the following conditions:

- At least one of the purple folders must be next to a yellow folder.
- The orange folder cannot be next to a yellow folder.
- The three gray folders cannot be placed on three consecutive stands.
- Stand 5 must hold a gray folder.
- Either stand 1 or stand 8 or both must hold a yellow folder.

1. Which of the following is an acceptable ordering of colors of folders from left to right?

(A) Gray Gray Yellow Orange Gray Purple Purple Yellow
(B) Orange Gray Yellow Gray Purple Purple Gray Yellow
(C) Purple Yellow Gray Gray Gray Orange Purple Yellow
(D) Yellow Gray Purple Yellow Gray Orange Purple Gray.
(E) Yellow Gray Yellow Gray Gray Purple Orange Purple

Group by Md Mahmud

2. If a gray folder is placed on stand 4, another gray folder could be placed on any of the following stands EXCEPT:

(A) 1 (B) 3 (C) 5 (D) 7 (E) 8

3. If purple folders are on stands 1 and 2, which of the following must be true?

(A) A gray folder is on stand 3.
(B) The orange folder is on stand 4.
(C) A gray folder is on stand 4.
(D) A yellow folder is on stand 6.
(E) The orange folder is on stand 8.

4. If stand 2 holds an orange folder, which of the following must be true?

(A) Stand 1 holds a gray folder.
(B) Stand 3 holds a purple folder.
(C) Stand 6 holds a purple folder.
(D) Stand 7 holds a yellow folder.
(E) Stand 8 holds a yellow folder.

5. If stands 1 and 3 hold gray folders, any of the following could be true EXCEPT:
   (A) Stand 2 holds a yellow folder.
   (B) Stand 4 holds an orange folder.
   (C) Stand 6 holds a purple folder.
   (D) Stand 7 holds a yellow folder.
   (E) Stand 7 holds an orange folder.

Puzzle- 21:

Seven children - Frank, Joan, Kate, Manuel, Rose, Sam, and Theresa—are eligible to enter a spelling contest. From these seven, two teams must be formed, a red team and a green team, each team consisting of exactly three of the children. No child, can be selected for more than one team. Team selection is subject to the following restrictions:

- If Manuel is on the red team, Kate must be selected for the green team.
- If Frank is on the red team, Rose, if selected, must be on the green team.
- Rose cannot be on the same team as Sam.
- Joan cannot be on the same team as Kate.

1. Which of the following can be the three members of the red team?
   (A) Frank, Joan, and Kate
   (B) Frank, Rose, and Theresa
   (C) Joan, Kate, and Theresa
   (D) Kate, Manuel, and Rose
   (E) Manuel, Rose, and Theresa

Group by Md Mahmud

2. If Manuel and Frank are both on the red team, the green team can consist of which of the following?
   (A) Joan, Kate, and Rose
   (B) Joan, Sam, and Theresa
   (C) Kate, Rose, and Sam
   (D) Kate, Rose, and Theresa
   (E) Rose, Sam, and Theresa

IBA-MBA Preparation for Beginners

3. If Manuel is on the red team, which of the following, if selected, must also be on the red team?
   (A) Frank (B) Joan (C) Rose (D) Sam (E) Theresa

4. If Frank is selected for the red team and Theresa is not selected for either team, then which of the following CANNOT be a member of the green team?
   (A) Joan (B) Kate (C) Manuel (D) Rose (E) Sam

Puzzle- 22:

Five persons - J, K, L, M, and O - have gathered to play a game called "forest and trees." Four players play in each round, with one person sitting out. Rounds are played by two competing teams of two persons each.

The players have agreed on the following rules of participation:

- No two players can play as a team in two consecutive rounds of the game.
- After a round is concluded, one person from the losing team in that round must sit out the next round of the game.
- After a round is concluded, the person who has sat out that round and a person from the winning team in that round join to form the team that is known as "the forest" for the next round.
- After a round is concluded, one person from the losing team in that round and one person from the winning team in that round join to form the team that is known as "the trees" for the next round.
- No round of the game can end in a tie.
- Because L and O are perceived as having the greatest individual strengths as players, L and O can never play on the same team.

Group by Md Mahmud

1. If, in the first round of a game, J and O are the winning team and L sits out, which of the following must be a team in the second round of that game?

(A) J and L
(B) K and L
(C) K and M
(D) L and M
(E) M and O

IBA-MBA Preparation for Beginners

2. If, in the first round of a game, K and L are the winning team and J sits out, which of the following could be a team in the second round of that game?

(A) J and M
(B) J and O
(C) K and L
(D) K and O
(E) M and O

3. If J and M are the winning team in the first round, each of the following could be a member of "the forest" during the second round EXCEPT

(A) J (B) K (C) L (D) M (E) O

4. If M sits out the first round, each of the following could be a team in the first round EXCEPT

(A) J and K (B) J and L (C) J and O (D) K and L (E) K and O

Puzzle- 23:

A veterinarian is doing an informal study of the growth of exactly seven poodles—Fido, Monet, Pal, Quixote, Rover, Spot, and Tache—all six-month-old puppies from the same litter. The veterinarian's assistant collected the following comparative data concerning the poodles' heights:

- Rover is taller than Tache.
- Quixote is taller than Spot.
- Fido is taller than Tache.
- Pal is taller than Monet, but Tache is taller than Pal.
- None of the seven poodles is exactly the same height as any other poodle from the litter.

1. Which of the following could be the correct ordering of the poodles from tallest to shortest?
   (A) Fido, Rover, Tache, Monet, Quixote, Pal, Spot
   (B) Quixote, Spot, Fido, Tache, Pal, Rover, Monet
   (C) Rover, Fido, Tache, Pal, Quixote, Monet, Spot
   (D) Rover, Tache, Quixote, Pal, Spot, Fido, Monet
   (E) Spot, Rover, Fido, Tache, Pal, Quixote, Monet

Group by Md Mahmud

2. Which of the following must be true?
   (A) Fido is taller than Pal.
   (B) Fido is taller than Rover.
   (C) Quixote is taller than Pal.
   (D) Spot is taller than Monet.
   (E) Tache is taller than Spot.

3. If Spot is taller than Tache, which of the following must be true?
   (A) Quixote is taller than Fido
   (B) Quixote is taller than Pal.
   (C) Quixote is taller than Rover.
   (D) Rover is taller than Fido.
   (E) Tache is taller than Quixote.

4. If Tache is taller than Quixote, any of the following can be true EXCEPT:
   (A) Monet is taller than Quixote.
   (B) Quixote is taller than Pal.
   (C) Quixote is taller than Rover.
   (D) Spot is taller than Monet.
   (E) Spot is taller than Pal.

Puzzle- 24:

Seven persons—N, Q, R, S, T, U, and W—are all the persons present at a party. All of them join distinct conversational groups that form during the party and that consist of two, three, or four persons at a time. At any time during the party, each of the persons present is considered to be a member of exactly one of the conversational groups. During the party the following conditions are satisfied:

- N can never be in the same conversational group as S.
- T must be in a conversational group that includes either S or W, but T cannot be in a conversational group with both S and W.
- W must be in a conversational group that consists of exactly three persons.

1. Which of the following lists three conversational groups that can exist at the same time during the party?

(A) N and S Q,T, and W R and U
(B) N and T R and S Q, U, and W
(C) N and U R and S Q, T, and W
(D) N and W S and U Q, R, and T
(E) N, U and W S and Q R and T

Group by Md Mahmud
IBA-MBA Preparation for Beginners

3. If Freddy sits immediately beside Vicky, which of the following CANNOT be true?
(A) Jonathan sits immediately beside Sarah.
(B) Lupe sits immediately beside Vicky.
(C) Hilary sits in the front passenger seat.
(D) Freddy sits on the same bench as Hilary.
(E) Hilary sits on the same bench as Roberto.

4. If Sarah sits on a bench that is behind where Jonathan is sitting, which of the following must be true?
(A) Hilary sits in a seat or on a bench that is in front of where Marta is sitting.
(B) Lupe sits in a seat or on a bench that is in front of where Freddy is sitting.
(C) Freddy sits on the same bench as Hilary.
(D) Lupe sits on the same bench as Sarah.
(E) Marta sits on the same bench as Vicky

Puzzle- 27:

A garden plot consists of seven parallel rows of vegetables, the rows numbered consecutively one through seven. In each row a different one of seven vegetables J, K, L, M, N, O, P—is to be grown according to the following conditions:

- Neither J nor K can be in a row next to the row P is in.
- M must be grown in either row one or row seven.
- L must be grown in a row next to a row containing either N or P, or in a row that is the only row between the rows containing N and P.
- If O is next to only one other row of vegetables, that row must contain K.

1. If P is next to M, and O is in the seventh row, in which row must P be planted?
(A) 2 (B) 3 (C) 4 (D) 5 (E) 6

2. Which of the following is a possible order for the vegetables in the garden plot, beginning with row one?
(A) L J K N P O M
(B) M P J L N K 0
(C) M N L P O J K
(D) M N L P J K 0
(E) N P L J M O K

3. If O is in the first row and J is in the sixth row, which vegetable must be in the fourth row?
(A) K (B) L (C) M (D) N (E) P

4. If J, K, L, N, and P are in the inner five rows, which of the following is a possible ordering of these vegetables in the five rows?
(A) J K L P N
(B) J N L P K
(C) K L J N P
(D) K N P L J
(E) L J K N P

Puzzle- 28:

Three desk drawers—I, II, and III—are being stocked with seven types of articles. Hand computers, ink pens, labels, markers, rulers, stationery, and tapes are to be placed in the drawers so that the articles belonging to any given type are all together in one drawer and no drawer contains more than three types of articles. The arrangement of the types of articles is subject to the following further constraints:

- Hand computers and rulers must be in a drawer together.
- Neither ink pens nor markers can be in the same drawer as labels.
- Neither ink pens nor markers can be in the same drawer as stationery.
- The stationery must be in either drawer I or drawer II.
- Each type of article must be in some drawer or other.

1. Which of the following is an acceptable arrangement?

	Drawer I	Drawer II	Drawer lll
A	Ink pens	Markers, stationery, Tapes	Hand computers, labels, rulers
B	Ink pens, labels, stationery	Markers, tapes	Hand computers, rulers
C	Labels, stationery, tapes	Hand computers, ink pens, markers	Rulers
D	Labels, stationery, tapes	Ink pens, markers	Hand computers, rulers
E	Labels, tapes	Ink pens, markers	Hand computers, rulers, stationery

(B) Ink pens are in I and markers are in II.
(C) Ink pens are in I and markers are in III.
(D) Markers are in I and tapes are in II.
(E) Stationery is in I and labels are in II.

Puzzle- 29:

A book club holds two discussion sessions each summer. The discussion leader of the club is selecting two groups of books—Group 1 and Group 2—for the sessions. She is choosing from seven books—T, U, V, W, X, Y, and Z. Group 1 will contain four of the books and Group 2 will contain the other three books. The leader must select the books for each group according to the following restrictions:

- T cannot be in the same group as U.
- If X is in Group 2, Z must also be in Group 2.
- If Z is in Group 1, W must also be in Group 1.

1. If T and Z are in Group 2, any of the following books can also be in Group 2 EXCEPT:
   (A) U (B) V (C) W (D) X (E) Y

2. If Z is in Group 1, which of the following must be true?
   (A) T is in Group 1.
   (B) V is in Group 2.
   (C) X is in Group 2.
   (D) U is in the same group as V.
   (E) W is in the same group as Y.

Group by Md Mahmud

3. If X is in Group 2, which of the following must be true?
   (A) T is in Group 2.
   (B) U is in Group 2.
   (C) W is in Group 1.
   (D) Y is in the same group as Z.
   (E) Z is in the same group as U.

Puzzle- 30:

A flat wilderness area has four widely separated shelters—F, G, W, and X—that are connected by exactly four straight trails—Q, R, S, and T—that are equal to each other in length and connect the shelters in the following ways:

- Q connects F and W only.
- R connects G and W only.
- S connects F and, G only.
- T connects G and X only.
- The shelters are at the ends of the trails.

1. Which of the following is the order in which a hiker, starting at F, using only trails and using no trail more than once, must reach the other shelters?

(A) G, W, X
(B) W, G, X.
(C) W, X, G
(D) X, G, W
(E) X, W, G

Group by Md Mahmud

2. If a hiker is at X and wants to reach F by a sequence of trails no longer than necessary, there are how many trail sequences of minimal length from which to choose?

(A) One (B) Two (C) Three (D) Four (E) Five

IBA-MBA Preparation for Beginners
Public group · 20.0K members

3. If a hiker restricts herself to the trails, any of the following is a possible sequence in which full lengths of trails are hiked EXCEPT

(A) Q, S, R, T, S.
(B) R, Q, S, R, Q
(C) S, T, T, R, Q
(D) T, R, R, T, T
(E) T, S, Q, R, T

4. If a hiker walks the full length of each trail exactly once, which of the following lists all those shelters and only those shelters at which the hiker must be exactly twice?

(A) G.
(B) F and G
(C) G and W
(D) G and X
(E) G, W, and X

5. If, by taking shortcuts that stray from the trails, a hiker could travel from W to X over a shorter distance than the shortest distance between W and X by trail alone, which of the following must be true?
(A) The shortest distance by trail alone from F to X is less than the shortest distance by trail alone from W to X.
(B) The shortest sequence of trails between F and X is the shortest distance between F and X.
(C) The route composed of R and T is not a straight line
(D) The route composed of S and T is not a straight line.
(E) R meets T at a right angle.

6. If the straight-line distance between F and X is the same as the straight-line distance between W and X, which of the following can result if new straight trails are added between F and X and between W and X?
(A) The shortest distance by trail between any shelter and any other shelter is the same.
(B) The number of trails required for the shortest possible hike by trail between any shelter and any other shelter is one.
(C) The shortest distance by trail between F and X is less than the shortest distance between W and X.
(D) A hiker must travel fewer trails to travel the shortest distance between F and X than to travel the shortest distance between F and G.
(E) A hiker must travel fewer trails to travel the shortest distance between W and G than to travel the shortest distance between W and F.

Puzzle- 31:

Packing labels identify individual packages by means of a four-symbol identification code running left to right. The symbols used are the four digits 1, 2, 3, and 4 and the four letters W, X, Y, and Z.

- Each code consists of two digits and two letters.
- The two digits must be next to each other, and the two letters must be next to each other.
- Of the two digits, the one to the left must be less than the one to the right.
- The two letters must be different letters.

1. Which of the following could be the third symbol in a code in which the fourth symbol is 3?
   (A) W (B) X (C) Z (D) 1 (E) 4

2. Which of the following must be true of any code in which the letter W occurs?
   (A) The letter X also occurs in that code.
   (B) The letter Y also occurs in that code.
   (C) The letter Z also occurs in that code.
   (D) The letter W occurs in that code exactly once.
   (E) The letter W occurs in that code exactly twice.

Puzzle- 34:

A personnel officer is scheduling a single interview with each of seven individuals: Fay, Gary, Julio, Mary, Nicholas, Pilar, and Teresa. Each interview is to be 30 minutes in length, and the interviews are to be scheduled back-to-back, starting at 9 a.m., according to the following conditions:

- Gary's interview must be scheduled to begin at either 9 a.m. or 10:30 a.m.
- Pilar's interview must be scheduled either as the next interview after Gary's interview or as the next interview after Nicholas' interview.
- Nicholas' interview must be scheduled to occur sometime after Mary's interview and sometime before Fay's interview.
- Julio's interview must be scheduled to begin exactly one hour after Teresa's interview is scheduled to begin.

1. Which of the following is an acceptable schedule for the seven people?

	9 am	9:30 am	10 am	10:30 am	11 am	11:30 am	12 noon
A	G	N	P	M	T	F	J
B	G	P	T	M	J	N	F
C	M	G	P	T	N	J	F
D	M	T	J	G	N	P	F
E	T	P	J	G	M	N	F

2. Which of the following people can be scheduled for the interview that begins at 9 a.m.?
(A) Fay (B) Julio (C) Mary (D) Nicholas (E) Pilar

3. The earliest time that Julio's interview can be scheduled to begin is
(A) 9:30 a.m.
(B) 10 a.m.
(C) 10:30 a.m.
(D) 11 a.m.
(E) 11:30 a.m.

4. If Nicholas' interview is scheduled to begin at 9:30 a.m., who must be scheduled for the interview that begins at 11 a.m.?

(A) Fay (B) Julio (C) Mary (D) Pilar
(E) Teresa

5. If the interview schedule shows Teresa's interview as the next after Pilar's and Pilar's interview as the next after Nicholas', how long after Gary's interview is scheduled to begin must Julio's interview be scheduled to begin?

(A) 30 minutes
(B) 1 hour
(C) 90 minutes
(D) 2 hours
(E) 3 hours

6. If Teresa is scheduled for the interview that begins at 9 a.m., Fay's interview must be scheduled to begin at

(A) 9:30 a.m.
(B) 10:30 a.m.
(C) 11 a.m.
(D) 11:30 a.m.
(E) 12 noon

Puzzle- 35:

F, G, and H are insurance companies, and Q, R, S, and T are private detectives. Each detective works for at least one of the insurance companies.

- Q always works for F and at least one of the other companies.
- Some of the time G employs only one of these detectives; the rest of the time it employs exactly two of them.
- F and H each employ exactly two of these detectives all the time.

1. If R works for H only, and if S works for G and H only, T works for
   (A) F only
   (B) G only
   (C) H only
   (D) both F and G
   (E) both F and H

2. If Q and R both work for the same two insurance companies, T must work for
   (A) both F and G
   (B) both F and H
   (C) either F or G but not both
   (D) either F or H but not both
   (E) either G or H but not both

3. Whenever only S works for G, which of the following must be true?
   (A) R works for either F or G but not both.
   (B) T works for either G or H but not both.
   (C) Q and R cannot work for the same company.
   (D) Q and T cannot work for the same company.
   (E) R and T cannot work for the same company.

4. Whenever G employs only one detective, which of the following must be true?
   I. R works for two insurance companies.
   II. T works for G.
   III. S works for only one insurance company.

(A) I only
(B) II only
(C) III only
(D) I and II only
(E) II and III only

Puzzle- 36:

A researcher is experimenting with varying arrangements of exactly six units that are electrical conductors—G, J, K, M, P, and S—in a loop containing eight positions, each capable of containing one conductor. In each arrangement, each conductor is at one of the eight positions and two positions are empty. In devising arrangements, the researcher must obey the following restrictions:

- G must be directly adjacent to J.
- P must be directly adjacent to S.
- M must be directly adjacent to S on one side and to an empty position on the other.
- A signal can be transferred from one conductor directly to another when the two conductors are directly adjacent to each other, and only then. A signal can be transferred either way around the loop, from one conductor to another, until it reaches an empty position. A signal cannot be transferred across an empty position.

1. If a signal can be transferred, either directly or indirectly, from J to K, it must be true that a signal can be transferred, either directly or indirectly, from

(A) G to K (B) G to M (C) J to M (D) J to P (E) J to S

2. If K is directly adjacent to P, any of the following could be true EXCEPT:

(A) G is directly adjacent to K.
(B) J is directly adjacent to K.
(C) J is directly adjacent to P.
(D) G is directly adjacent to an empty position.
(E) J is directly adjacent to an empty position.

3. If P is directly adjacent to an empty position, which of the following is the greatest number of conductors, including starting and ending conductors, that can be used in the transfer of a single signal?

(A) Two (B) Three (C) Four (D) Five (E) Six

4. If there is one conductor that is directly adjacent to both of the empty positions, that conductor must be

(A) J (B) K (C) M (D) P (E) S

5. If a signal can be transferred from G to S, any of the following conductors could be directly adjacent to an empty position EXCEPT

(A) G (B) J (C) K (D) M (E) P

Puzzle- 37:

Researchers know that exactly six prehistoric ironworking sites—Q, R, S, T, V, and X—existed in the Windham area. Recently, the researchers have discovered three objects—1, 2, and 3—that they know must have been made by ironworkers in the Windham area. The researchers would like now to determine the specific site at which each object was made. The objects are different enough in composition and style to leave no doubt that each was made at a different site. In addition, the researchers have established the following:

- If any of the objects was made at Q, none of them was made at T.
- If any of the objects was made at R, none of them was made at S.
- One of the objects was made at V.
- Object 2 was not made at X.
- Object 3 was made neither at S nor at X.

1. If Object 1 was made at T, Object 3 could have been made at which of the following?
(A) Q (B) R (C) S (D) T (E) X

Group by Md Mahmud

2. Object 1, Object 2, and Object 3, respectively, could have been made at:
(A) Q, S, and X
(B) R, X, and V
(C) T, V, and S
(D) V, Q, and T
(E) V, S, and Q

IBA-MBA Preparation for Beginners
Public group · 20.0K members

3. If neither Q nor T was a site at which any of the objects was made, which of the following must be true?
(A) Object 1 was made at X.
(B) Object 2 was made at S.
(C) Object 2 was made at V.
(D) Object 3 was made at R.
(E) Object 3 was made at V.

4. The researchers could determine exactly which object was made at which site if they knew that the only three sites at which objects were made were:
(A) Q, R, and V
(B) Q, V, and X
(C) R, T, and V
(D) S, T, and V
(E) S, V, and X

Puzzle- 38:

K, L, C, E, H, T and P are sitting around a circular table facing the centre but not necessarily in the same order.

T is third to the right of H.

L is fourth to the left of P.

P is to the immediate right of H.

C is fourth to the right of E.

E is not an immediate neighbor of T.

Draw a sitting arrangement that fulfills the above conditions.

Puzzle- 39:

Seven children - Frank, Joan, Kate, Manuel, Rose, Sam, and Theresa-are eligible to enter a spelling contest. From these seven, two teams must be formed, a red team and a green team, each team consisting of exactly three of the children. No child, can be selected for more than one team. Team selection is subject to the following restrictions:

- If Manuel is on the red team, Kate must be selected for the green team.
- If Frank is on the red team, Rose, if selected, must be on the green team.
- Rose cannot be on the same team as Sam.
- Joan cannot be on the same team as Kate.

1. Which of the following can be the three members of the red team?
   (A) Frank, Joan, and Kate
   (B) Frank, Rose, and Theresa
   (C) Joan, Kate, and Theresa
   (D) Kate, Manuel, and Rose
   (E) Manuel, Rose, and Theresa

Group by Md Mahmud

2. If Manuel and Frank are both on the red team, the green team can consist of which of the following?
   (A) Joan, Kate, and Rose
   (B) Joan, Sam, and Theresa
   (C) Kate, Rose, and Sam
   (D) Kate, Rose, and Theresa
   (E) Rose, Sam, and Theresa

Puzzle- 42:

A conference organizer must select exactly three discussants to respond to a paper to be presented by an invited speaker. The three discussants will be selected from seven volunteers, of whom four- Ito, Kemble, Lopez, and Miller-are known to be friendly to the speaker's theoretical point of view. The other three- Shapiro, Thompson, and Ullman -are known to be hostile to the speaker's theoretical point of view. In selecting the three discussants, the conference organizer must observe the following restrictions:

→At least one friendly discussant and at least one hostile discussant must be among those selected.

→If Ito is selected, Thompson cannot be selected.

→If either Lopez or Miller is selected, the other must also be selected.

→If either Kemble or Ullman is selected, the other must also be selected.

1. Which of the following could be the group of discussants selected?

(A) Ito, Lopez, and Miller

(B) Ito, Shapiro, and Thompson

(C) Kemble, Shapiro, and Ullman

(D) Lopez, Shapiro, and Thompson

(E) Miller, Thompson, and Ullman

Group by Md Mahmud

2. If Ito is selected as a discussant, which of the following must also be among those selected?

(A) Lopez (B) Miller (C) Shapiro (D) Thompson (E) Ullman

3. Which of the following is a pair of volunteers that can be selected together as discussants?

(A) Ito and Lopez

(B) Ito and Shapiro

(C) Kemble and Lopez

(D) Miller and Shapiro

(E) Miller and Ullman

4. The members of the group of discussants would be completely determined if which of the following additional restrictions had to be observed as well?

(A) Friendly discussants must be in the majority.

(B) Hostile discussants must be in the majority.

(C) Neither Ito nor Thompson can be selected.

(D) Neither Kemble nor Shapiro can be selected.

(E) Neither Lopez nor Thompson can be selected.

5. The group of discussants selected must include either:
(A) Ito or Shapiro
(B) Kemble or Shapiro
(C) Kemble or Thompson
(D) Lopez or Miller
(E) Lopez or Ullman

Puzzle- 43:

At a large airport, the airport loop bus travels to Terminal A, Terminal B, and Long-Term Parking. The bus makes four stops at Terminal A-these are called A1, A2, A3, and A4, in that order. Next, the bus makes three stops at Terminal B-B1, B2, and B3, in that order. The bus then stops at Long-Term Parking. From Long-Term Parking the bus proceeds to A 1 and repeats the entire loop.

At the same airport, an express monorail travels back and forth between A3 and Long-Term Parking only, and another express monorail travels back and forth between B2 and Long-Term Parking only.

The loop bus and two monorails are the only ways to move among the stops above. All transportation at the airport operates continuously and is available at no charge to all who wish to travel.

1. To travel from Long-Term Parking to A4 making the fewest possible intermediate stops, a person must take the:
(A) loop bus, but neither monorail
(B) monorail to Terminal A, but neither the loop bus nor the other monorail
(C) loop bus first and the monorail to Terminal A second
(D) monorail to Terminal A first and the loop bus second
(E) monorail to Terminal B first and the loop bus Second

Group by Md Mahmud

Public Group · 20.6K members

2. Which of the following could be the second intermediate stop for a person traveling from A2 to B3?
(A) A3 (B) BI (C) B2 (D) B3 (E) Long-Term Parking

3. If all of the following trips are to be made with the fewest possible intermediate stops, the trip that requires use of both a monorail and the loop bus is:
(A) A2 to A3
(B) A4 to BI
(C) Long-Term Parking to A2
(D) Long-Term Parking to A4
(E) Long-Term Parking to B2

Puzzle- 44:

A veterinarian is doing an informal study of the growth of exactly seven poodles—Fido, Monet, Pal, Quixote, Rover, Spot, and Tache—all six-month-old puppies from the same litter. The veterinarian's assistant collected the following comparative data concerning the poodles' heights:

- Rover is taller than Tache.
- Quixote is taller than Spot.
- Fido is taller than Tache.
- Pal is taller than Monet, but Tache is taller than Pal.
- None of the seven poodles is exactly the same height as any other poodle from the litter.

1. Which of the following could be the correct ordering of the poodles from tallest to shortest?
   (A) Fido, Rover, Tache, Monet, Quixote, Pal, Spot
   (B) Quixote, Spot, Fido, Tache, Pal, Rover, Monet
   (C) Rover, Fido, Tache, Pal, Quixote, Monet, Spot
   (D) Rover, Tache, Quixote, Pal, Spot, Fido, Monet
   (E) Spot, Rover, Fido, Tache, Pal, Quixote, Monet

Group by Md Mahmud

2. Which of the following must be true?
   (A) Fido is taller than Pal.
   (B) Fido is taller than Rover.
   (C) Quixote is taller than Pal.
   (D) Spot is taller than Monet.
   (E) Tache is taller than Spot.

3. If O is in the first row and J is in the sixth row, which vegetable must be in the fourth row?
(A) K (B) L (C) M (D) N (E) P

4. If J, K, L, N, and P are in the inner five rows, which of the following is a possible ordering of these vegetables in the five rows?
(A) J K L P N
(B) J N L P K
(C) K L J N P
(D) K N P L J
(E) L J K N P

Puzzle- 47:

A museum curator must group nine paintings- F, G, H, J, K, L, M, N and O in twelve spaces numbered consecutively from 1-12. The paintings must be in three groups, each group representing a different century. The groups must be separated from each other by at least one unused wall space. Three of the paintings are from the eighteenth century, two from the nineteenth century, and four from the twentieth century.

Unused wall spaces cannot occur within groups.

- G and J are paintings from different centuries.
- J, K and L are all paintings from the same century.
- Space number 5 is always empty.
- F and M are eighteenth century paintings.
- N is a nineteenth century painting.

1. If space 4 is to remain empty, which of the following is true?
   (A) space number 10 must be empty
   (B) the groups of paintings must be hung in chronological order by century
   (C) an 18th century painting must be hung in space 3
   (D) a 19th century painting must be hung in space 1
   (E) a 20th century painting must be hung in space 12

Group by Md Mahmud
IBA-MBA Preparation for Beginners
Public Group · 200K members

2.If the paintings are hung in Reverse chronological order by century, the unused wall spaces could be:
   (A) 1,5 and 10
   (B) 1,6 and 10
   (C) 4,7 and 8
   (D) 5,8 and 12
   (E) 5,9 and 10

3.Which of the following is a space that cannot be occupied by a 19th century paintings:
   (A) space 1
   (B) space 6
   (C) space 8
   (D) space 11
   (E) space 12

4.If J hangs in space 11, which of the following is a possible arrangement for spaces 8 and 9?
   (A) F in 8 and M in 9
   (B) K in 8 and G in 9
   (C) N in 8 and G in 9
   (D) 8 is unused and H in 9
   (E) 8 is unused and F in 9

5. If the 20th century paintings are hung in space 1-4 which of the following cannot be true?
   (A) space 8 is unused
   (B) Space 9 is unused
   (C) F is hung in space 6
   (D) M is hung in space 12
   (E) N is hung in space 9

6. If the first five paintings in numerical order of spaces are F, O, M, N, G which of the following must be true?
   (A) either space 1 or space 4 is unused
   (B) either space 7 or space 12 is unused
   (C) H hangs in space 11
   (D) Two unused spaces separate the 18th century and 19th century paintings
   (E) Two unused spaces separate the 19th Century and 20th century paintings

Puzzle- 48:

In a telecommunications cable assembly plant, cables are assembled by twisting plastic coated wires together. There are wires of exactly 6 different solid colours - red, yellow, violet, green, white and black. Wires must be assembled into single cables according to the following rules :

- Each cable must contain at least three wires and wires of at least three different colours
- At most two wires in a single cable can be black.
- At most two wires in a single cable can be white
- There can be at most one wire of each of the Other colours in a single cable
- If one wire is Red, then one wire must be yellow
- If one wire is violet then no wire can be green

1. Which of the following could be the complete set of wires in an acceptable cable?
   (A) a green wire, a white wire and a violet wire
   (B) a violet wire, a black wire and a white wire
   (C) a red wire, a black wire and a green wire
   (D) A yellow wire and exactly two black wires
   (E) exactly two black wires and exactly two White wires

Group by Md Mahmud

2.The maximum number of wires that can be used in an acceptable cable is:
   (A) 8
   (B) 7
   (C) 6
   (D) 5
   (E) 4

IBA-MBA Preparation for Beginners
Public group · 20.0K members

3. If exactly One black wire and exactly one white wire are used in an assembled cable which of the following must be true—
   (A) The cable contains no more than 5 wires
   (B) The cable contains exactly six wires
   (C) The cable contains a yellow wire
   (D) The cable does not contain a red wire
   (E) The cable does not contain a violet colour

4. If a white wire and a violet wire must be among the wires chosen for a particular cable, any of the following pairs of wires could complete the cable except a:
   (A) black wire and a second white wire
   (B) yellow wire and a second white wire
   (C) yellow wire and a black wire
   (D) red wire and a yellow wire
   (E) red wire and a black wire

5. If an assembled cable consists of exactly 5 wires each a different colour it could be true that a colour not used is:

(A) Black
(B) White
(C) Green
(D) Red
(E) Yellow

6. If there is an additional requirement that violet must be used if yellow is used, which of the following must be true:

(A) no cable contains fewer than 6 wires
(B) no cable contains more than 5 wires
(C) green is never used if red is used
(D) red is always used if violet is used
(E) black is used exactly once if yellow is used

Puzzle- 49:

April trucking company trips always begin in one of the five cities served By April - northtown, overbridge, pomona, quakertown and riverside- and always end in one of these cities
April drivers travel from City to city only on the roots listed in the mileage table below
Northtown-Overbridge: 100 miles
Northtown- Pomona: 100 miles
Northtown- Riverside: 200 miles
Pomona-Quakertown: 200 miles
Quakertown -riverside: 300 miles
The routes listed above have no stretch of road in common. The maximum distance an April driver can travel without making an overnight stop is 300 miles
Overnight stops must be made in cities served by April

1. Which of the following is a trip an aprill driver could make without an overnight stop?
   (A) from Northtown to riverside to Quakertown
   (B) from Riverside to quakertown to pomona
   (C) from quakertown to riverside to North town
   (D) from Northtown to pomona to quakertown
   (E) from Quakertown to pomona to northtown to over bridge

2. What is the minimum number of overnight stops that an april driver who travels from overbridge to Northtown to riverside to Quakertown must make before arriving in quakertown?
   (A) 1
   (B) 2
   (C) 3
   (D) 4
   (E) 5

3. What is the maximum number of cities including the cities where the trip begins and ends that can be served by an April driver who makes no overnight stops during the course of the trip?
   (A) 2
   (B) 3
   (C) 4
   (D) 5
   (E) 6

4. Which of the following is a list of the cities to which an April driver can travel from Pomona returning to Pomona on the same day he or she left?
   (A) Northtown only
   (B) Overbridge only
   (C) Quakertown only
   (D) Both Northtown and Quakertown
   (E) Both Northtown and Overbridge

5. which of the following accurately describe the possibilities for overnight stops during trips By April drivers that begin in over bridge and end in Quaker town after including two other cities served By April:
   (A) the trip can be made without an overnight stop
   (B) it is not possible to make an overnight stop at North town
   (C) Riverside is the only possible place to make an overnight stop
   (D) if exactly two overnight stops are made on a trip they can be made only at pomona and riverside
   (E) anyone of three cities north town pomona and Riverside is a possible overnight stop

Puzzle- 50

A duty officer is making up an assignment roster for three paramedic teams. Each team will be assigned to exactly one of three sectors of the city: Sector 1, Sector 2, or Sector 3.
Each team will consist of two of the following paramedics:
Greg, Helen, Ida, Karla, Luther, and Miguel. Each paramedic will be on exactly one team.
Ida, Luther, and Miguel have each completed a special emergency-driver training program; Greg, Helen, and Karla have not.
Greg, Helen, and Ida each have at least three years of job experience; Karla, Luther, and Miguel do not.
The duty officer must observe the following restrictions in making up the assignment roster:
Each team must include at least one paramedic who has completed the special emergency-driver training program.
Each team must include at least one paramedic who has at least three years of job experience.
Greg must be assigned either to Sector 1 or to Sector 2.

1. Which of the following assignment rosters is permitted by the restrictions?

Sector 1	Sector 2	Sector 3
(a) Greg and Karla	Helen and Luther	Ida and Miguel
(b) Greg and Luther	Helen and Karla	Ida and Miguel
(c)Helen and Miguel	Greg and Luther	Ida and Karla
(d) Helen and Miguel	Ida and Luther	Greg and Karla
(e) Ida and Karla	Greg and Helen	Luther and Miguel

2. Which of the following must be true?

(A) Greg will be Karla's partner.
(B) Greg will be Luther's partner.
(C) Helen will be Luther's partner.
(D) Ida will be Karla's partner.
(E) Ida will be Miguel's partner.

3. Which of the following is a complete and accurate list of the paramedics whom the duty officer can assign to be Miguel's partner?

(A) Greg, (B) Helen (C) Luther (D) Greg, Helen (E) Luther, Karla

4. If Helen is assigned to Sector 2, which of the following must be true?

(A) Karla is assigned to Sector 1.
(B) Karla is assigned to Sector 3.
(C) Luther is assigned to Sector 1.
(D) Miguel is assigned to Sector 1.
(E) Miguel is assigned to Sector 3.

Group by Md Mahmud

14. If Luther is assigned to Sector 3, which of the following must be true?

(A) Helen is assigned to Sector 1.
(B) Ida is assigned to Sector 2.
(C) Miguel is assigned to Sector 1.
(D) Greg is Luther's partner.
(E) Greg is Miguel's partner.

Puzzle- 51:

A professional violinist has agreed to give lessons to seven talented violin students—Fiona, Gerhard, Hugh, Isabel, Julia, Kent, and Leon—and for this purpose has set aside an hour each weekday, Monday through Friday. The week's schedule of lessons must meet the following conditions:

Each student must be scheduled for exactly one of the five days.

Exactly two of the lessons must each be for two students, but those two joint lessons cannot be on consecutive days.

Fiona's lesson must be on a day earlier in the week than Gerhard's lesson.

Hugh must be scheduled to be given his lesson by himself.

Isabel's lesson must be on the day immediately before the day of Julia's lesson.

1. Which of the following is an acceptable weekly schedule of lessons?

	Monday	Tuesday	Wednesday	Thursday	Friday
(A)	Fiona	Julia, Kent	Isabel, Leon	Hugh	Gerhard
(B)	Hugh	Fiona, Gerhard	Isabel	Julia, Kent	Leon
(C)	Isabel	Julia	Fiona, Hugh	Gerhard	Kent, Leon
(D)	Kent, Leon	Hugh	Isabel	Fiona, Julia	Gerhard
(E)	Leon	Julia, Kent	Hugh	Fiona, Isabel	Gerhard

2. If Hugh's lesson is scheduled for Wednesday, Isabel's lesson must be scheduled for either:

(A) Monday or Tuesday

(B) Monday or Thursday

(C) Monday or Friday

(D) Tuesday or Thursday

(E) Tuesday or Friday

3. The latest day in the week on which Fiona and Isabel could be given a joint lesson is:

(A) Monday

(B) Tuesday

(C) Wednesday

(D) Thursday (E) Friday

4. If a joint lesson for Gerhard and Julia is scheduled earlier in the week than a joint lesson for Kent and Leon, for which day must Hugh's lesson be scheduled?

(A) Monday (B) Tuesday (C) Wednesday (D) Thursday (E) Friday

5. If the two joint lessons are scheduled for as early in the week as possible, and Isabel's and Julia's lessons for as late in the week as possible, Leon could be given his lesson:

(A) With Gerhard
(B) With Isabel
(C) With Julia
(D) With Kent
(E) By himself

Puzzle- 52:

A book club holds two discussion sessions each summer.
The discussion leader of the club is selecting two groups
of books—Group 1 and Group 2—for the sessions. She
is choosing from seven books—T, U, V, W, X, Y, and Z. Group 1 will contain four of the books and Group 2 will contain the other three books.
The leader must select the books for each group according to the following restrictions:
T cannot be in the same group as U.
If X is in Group 2, Z must also be in Group 2.
If Z is in Group 1, W must also be in Group 1.

1. If T and Z are in Group 2, any of the following books can also be in Group 2 EXCEPT:
(A) X (B) V (C) U (D) W (E) Y

2. If Z is in Group 1, which of the following must be true?
(A) T is in Group 1.
(B) V is in Group 2.
(C) X is in Group 2.
(D) U is in the same group as X.
(E) W is in the same group as Y.

3. If X is in Group 2, which of the following must be true?
(A) T is in Group 2.
(B) U is in Group 2.
(C) W is in Group 1.
(D) Y is in the same group as Z.
(E) Z is in the same group as U.

Puzzle- 53:

Packing labels identify individual packages by means of a four-symbol identification code running left to right. The symbols used are the four digits 1, 2, 3, and 4 and the four letters W, X, Y, and Z.

Each code consists of two digits and two letters.

The two digits must be next to each other, and the two letters must be next to each other.

Of the two digits, the one to the left must be less than the one to the right.

The two letters must be different letters.

1*Which of the following could be the third symbol in a code in which the fourth symbol is 3?

(A) W (B) X (C) Z (D) 1 (E) 4

2*Which of the following must be true of any code in which the letter W occurs?

(A) The letter X also occurs in that code.

(B) The letter Y also occurs in that code.

(C) The letter Z also occurs in that code.

(D) The letter W occurs in that code exactly once.

(E) The letter W occurs in that code exactly twice.

3** If the first symbol in a code is 2, anyone of the following symbols could occur in one of the remaining three positions EXCEPT the:

(A) digit 1

(B) digit 3

(C) digit 4

(D) letter Y

(E) letter Z

Puzzle- 54:

Four women--G, H, I, and J--and four men--R, S, T, and V--are the eight people to be seated at a rectangular table. Three of the people are to sit on one side of the table, three are to sit on the other side of the table, one is to sit at the head of the table, and one is to sit at the foot of the table. The following restrictions on seating arrangements must be observed:

* Persons of the same sex cannot sit next to each other on the same side of the table.
* The person seated at the foot of the table cannot be the same sex as the person seated at the head of the table.
* T cannot be seated on the same side of the table as I.
* V cannot be seated on the same side of the table as J.

1 If V is seated at the head of the table and I is seated in the middle seat on one side of the table, which of the following must be true?

(A) J is seated at the foot of the table.
(B) R is seated at the foot of the table.
(C) G is seated on the same side of the table as I
(D) S is seated on the opposite side of the table from I
(E) T is seated on the opposite side of the table from l

2 If J is to be seated at the head of the table, each of the following could be seated at the foot of the table EXCEPT:

(A) H (B) R (C) S (D) T (E) V

3 If S is seated at the foot of the table, V is seated in an end seat on one side of the table, and I is seated in an end seat on the other side of the table, where must T be seated?

(A) At the head of the table
(B) In the middle seat on the same side of the table as V
(C) In an end seat on the same side of the table as V
(D) In the middle seat on the same side of the table as I
(E) In an end seat on the same side of the table as l

4 If T is seated at the head of the table, R is seated in the middle seat on one side of the table, and I is seated in the middle seat on the other side of the table, which of the following can be true?

(A) G is seated at the foot of the table
(B) H is seated on the same side of the table as I
(C) J is seated on the same side of the table as I
(D) S is seated on the same side of the table as R
(E) V is seated on the same side of the table as R

5 If T is seated at the foot of the table, V is seated in the middle seat on one side of the table, and I is seated in the middle seat on the other side of the table, which of the following must be seated at the head of the table?

(A) G (B) H (C) J (D) R (E) S

6 If T is seated at the foot of the table, V is seated in the middle seat on one side of the table, and I is seated in the middle seat on the other side of the table, which of the following must be seated at the head of the table?

(A) G (B) H (C) J (D) R (E) S

Puzzle- 55:

Exactly five persons—J, K, L, M, and O—have gathered to play a game called Trios. In each round of the game, exactly three of these persons must play.

The following are all the rules that affect the order of participation in, and the length of, an individual game:

No person can play in three consecutive rounds.

No person can sit out two consecutive rounds.

In any game, each of the five persons must play in exactly three rounds.

1. If J, K, and L play in a first round, which of the following could be the trio who play in that game's second round?

(A) J, K, M

(B) J, K, O

(C) J, L, M

(D) K, L, O

(E) K, M, O

Group by Md Mahmud

2. If, in an individual game, K, L, and M play in the first round and I, L, and M play in the third round, the players in the second round must be:

(A) J, K, L

(B) K, M, O

(C) J, K, O

(D) K, L, O

(E) J, M, O

IBA-MBA Preparation for Beginners
Public Group · 20.0K members

3. If, in an individual game, L and O do not play in the first round, which of the following must be true?

(A) L plays in rounds three and four.

(B) O plays in rounds three and five.

(C) L and O both play in round four.

(D) L and O both play in round five.

(E) M and O both play in round four.

4. If, in an individual game, J, L, and M play in the first round, and K, M, and O play in the second round, which of the following must play in the fourth round?

(A) J (B) K (C) L (D) M (E) O

5. If, in an individual game, J, M, and O play in the first round, and if M and K play in the fourth round, which of the following CANNOT have played in the third round?

(A) J (B) K (C) L (D) M (E) O

Puzzle- 56:

A theater ensemble group consisting of two male actors-Jeff and Kirk-and three female actors Rena, Sara, and Tanya-plans to give a performance of a play that has exactly eight roles . Roles 1, 2, and 3 must be played by males; roles 4, 5, and 6 must be played by females. Roles 7 and 8 can be played by either males or females. Each actor must play at least one role, and the number of roles necessitates that some of the actors will play more than one role. The pairs of roles below are the only pairs that do not require the actors playing the roles to be on stage at the same time; appearances in these roles are spaced far enough apart to allow time for costume changes for actors playing more than one role.

Roles 1 and 2
Roles 3 and 6
Roles 3 and 7
Roles 4 and 5
Roles 4 and 8
Roles 5 and 8

Rena and Sara cannot play roles that require them to be on stage together at the same time.

1. Each of the following pairs of roles could be played by the same actor EXCEPT:
(A) Roles 1 and 2
(B) Roles 3 and 6
(C) Roles 3 and 7
(D) Roles 4 and 5
(E) Roles 5 and 8

2. If Kirk plays role 1, which of the following must be true?
(A) Jeff plays role 2
(B) Jeff plays role 7
(C) Sara plays role 4
(D) Rena plays role 4
(E) Rena plays role 8

3. Which of the following is an acceptable assignment of roles 4, 5, and 6, respectively?
(A) Rena, Rena, Rena
(B) Rena, Tanya, Rena
(C) Rena, Sara, Tanya
(D) Sara, Tanya, Rena
(E) Sara, Tanya, Tanya

4. Jeff could play any of the following roles EXCEPT:
(A) 1 (B) 2 (C) 3 (D) 7 (E) 8

5. Which of the following actors CANNOT play more than one role, regardless of the other role assignments?

(A) Jeff (B) Kirk (C) Rena (D) Sara (E) Tanya
