3.

The scatter-plot graph above shows the amount of scholarship aid received by each of 20 students and the household income of his or her parents. Which of the following statements is (are) true?

I. There is a positive correlation between household income and amount of scholarship aid.

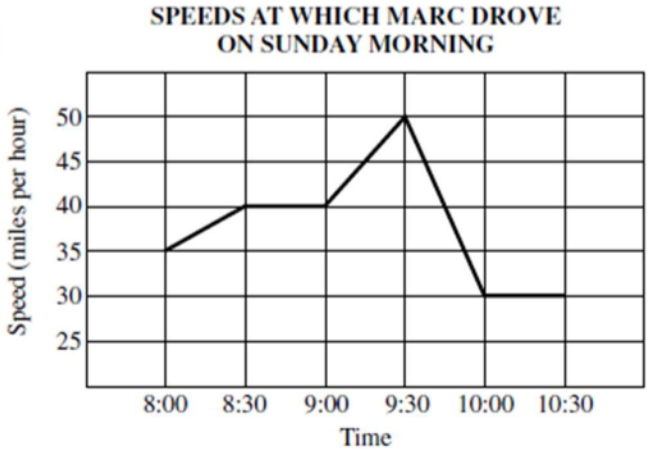

II. If Adam and Bob are two of the students in the survey and Adam's family had a higher income than Bob's family, then Bob received a bigger scholarship.

III. The slope of the line of best fit, measured in dollars of scholarship aid per dollars of household income, is less than 0.1.

(A) None (B) I only (C) II only (D) III only (E) I and III only

Page: 503 **Ans: D**

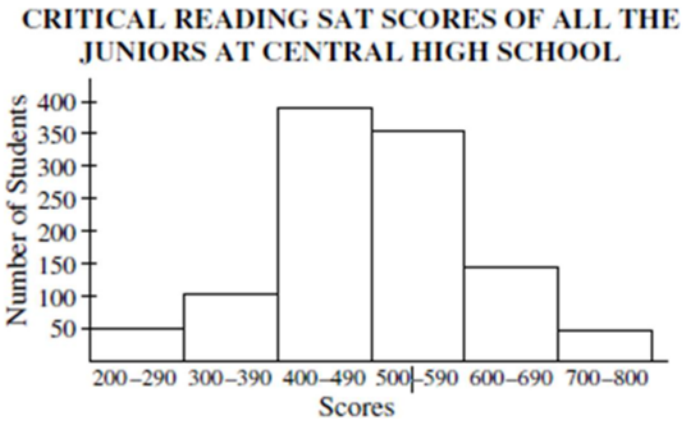

4.

- For what percent of the time was Marc driving at 40 miles per hour or faster?
- How far, in miles, did Marc drive between 8:30 and 9:00?
- What was Marc's average speed, in miles per hour, between 8:30 and 9:30?

Page: 504 **Ans: 50,20,42.5**

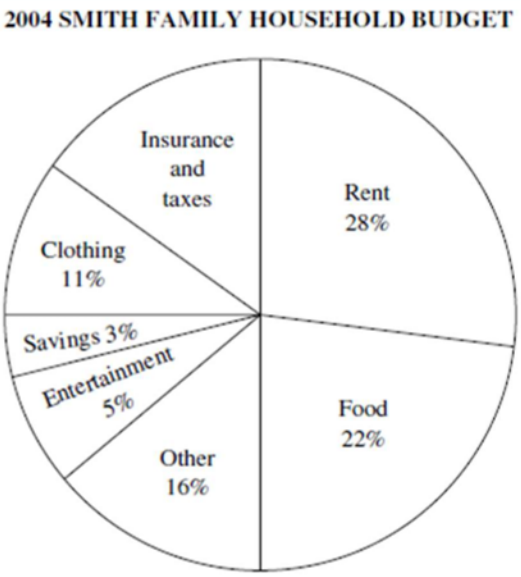

5.

- How many juniors at Central High School took the SAT?
- What percent of the juniors had Critical Reading SAT scores of less than 600?
- How many juniors had Critical Reading SAT scores between 450 and 550?

Page: 504 **Ans: 1100, 81.81%, cannot be determined**

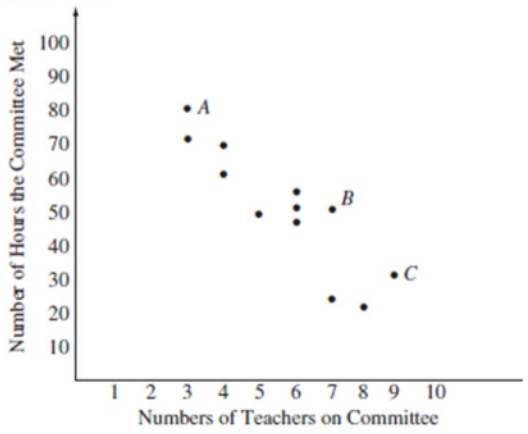

6.

- If the Smiths' income in 2004 was $40,000, how much more did they spend on insurance and taxes than they did on clothing?
- What is the degree measure of the central angle of the sector representing insurance and taxes? Page: 505 **Ans: 1600, 54**

7. In each of 12 school districts in 2004, a committee of math teachers wrote a curriculum for a new state-mandated course. In the following diagram, the number of teachers on each committee is plotted against the amount of time the committee met. For example, committee A had 3 teachers and the committee met for a total of 80 hours. Assume that no teacher missed a meeting; then, on committee A, each of the 3 teachers worked 80 hours.

- Which of the following statements must be true?

I. Whenever there were more than 7 teachers on a committee, the job took less time than when there were fewer than 7 teachers on a committee.

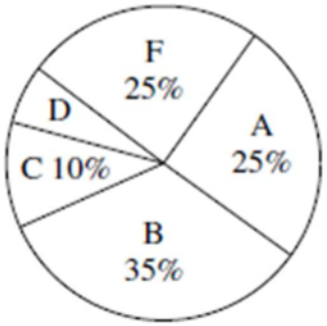

II. There is a negative correlation between the number of teachers on a committee and the time the committee took to write its curriculum.

III. On average, for each additional teacher on a committee the time to complete the project was reduced by 5 hours.

(A) I only (B) II only (C) I and II only (D) II and III only (E) I, II, and III

- What was the average (arithmetic mean) of the number of hours worked by the teachers on committees A, B, and C? Page: 505 **Ans: C, 45.26**

8.

- If 500 students took the exam, how many earned grades of D?
- What percent of the students who failed the exam would have had to pass it, in order for the percent of students passing the exam to be at least 85%?

Page: 505 **Ans: 25, 40**
